

MANOJ GEHLOT

Senior UX / Product Designer

9+ years making complex enterprise products simple — cybersecurity, workforce, and employee platforms. I own design end to end, from research to shipped UI, and build design systems that scale across teams.

SKILLS

Design Interaction Design · Information Architecture · Design Systems · Web, iOS & Android · Accessibility (WCAG/ADA)

Research User Research · Usability Testing · Design Validation · Heuristic Evaluation

Product Product Discovery · Complex Workflow Design · Systems Thinking · Team & Cross-functional Leadership

Tools & Front-end Figma · HTML · CSS3 · Bootstrap · AI-assisted Design Workflows

EXPERIENCE

Senior UX Designer

Oct 2024 – Present · Ahmedabad, India

ThreatModeler — *enterprise cybersecurity platform*

- Own end-to-end design for ThreatModeler NEXUS, an enterprise cybersecurity threat-modeling platform, across its core modules — from research and information architecture through prototyping and shipped UI.
- Built and scaled the token-based design system adopted across the platform, cutting UI inconsistencies by over 40% and speeding up handoff to engineering.
- Led the onboarding redesign and designed the dashboard, threat-model, and risk-register modules so dense security workflows stay fast for expert users.
- Lead the design work day to day — assigning and reviewing the team's tasks, prioritizing, and setting the standards they build on — and partner with product, engineering, and go-to-market on what ships.

UX/UI Specialist (promoted from Solution Designer)

Aug 2021 – Apr 2024 · Pune, India

Amdocs — *enterprise SaaS · workforce & employee platforms*

- Owned design across two enterprise platforms — Compass, for project and workforce management (allocations, leave and shifts, rostering, arrears, reporting), and an employee engagement platform (onboarding, events, mood check-ins, help desk).
- Simplified dense operational workflows into screens managers and employees could use without training, with accessibility (WCAG/ADA) built into the process.
- Built the design systems behind both platforms, reviewed and guided junior designers' work, and partnered with product managers and engineers from discovery through delivery.

Creative Designer (promoted from Designer)

May 2019 – Jul 2021 · Indore, India

Cyber Infrastructure Pvt. Ltd. — *B2B & B2C product studio*

- Led design for B2B and B2C products across industries, from client discovery to launch — running workshops that turned business problems into clear product direction.
- Simplified complex, multi-step flows for first-time users across web and mobile, and built shared component libraries the team reused across projects.

UI/UX Designer

Oct 2017 – May 2019 · Indore, India

Galaxy Weblinks

- Designed web and mobile (iOS and Android) interfaces from business requirements, partnered closely with engineering — comfortable in HTML, CSS3, and Bootstrap — and built reusable UI patterns used across projects.

Designer

Feb 2017 – Oct 2017 · Indore, India

Opulence Infotech

- Built early foundations: concept to developer-ready design, wireframing, prototyping, and design reviews with front-end teams.

EDUCATION & CERTIFICATIONS

Foundations of User Experience (UX) Design — Google	2025
Certification in Design Thinking & Innovation — IIT Delhi	2024
Bachelor of Science (B.Sc) — MP Bhoj University	2018
